

MEMORANDUM OF COOPERATION THE VISEGRAD YOUNG FILM DAYS

All participating organisations are interested in the further development of the audiovisual education. Together, we will take an active role in further strengthening our own organisations through training and participation in international study visits.

We see the importance to address different target groups from 3 to 19 years old.

By audiovisual we do not only mean film. We are happy to be involved in finding and developing work with short formats of audiovisual – typically festival films, but also video games and new media.

Our role is to continue to develop cooperation between the V4 countries and to strengthen the further development of audiovisual education.
